# We can beat this Together

Dear Parent,

Who would have believed that a time would come in modern history when the entire world could be laid siege to by a certain disease, altering for an extended period how we live and relate with each other.

School education as we know it, has been equally affected - now, for their safety, pupils cannot make it to school to learn. Without a credible remedy to the situation, the negative impact this evolving trend portends for our future as a society is best left to the imagination.

Even though the past couple of weeks have been trying, I must commend our parents who have struggled to bridge the gap caused by the discontinuation of formal schooling.

With the current term in doubt, the risk of experiencing a break in or kids learning routines, and a dip in their overall concentration levels, increases by the day.

I must say that I'm proud of the strides my team @Abacus has made in proffering a learning solution for or kids in these times, and in easing the burden on our parents to be impromptu teachers.

May I present the ABACUS Continued Learning Program that ensures every grade school child (that has a smart communication gadget at his/her disposal) can continue learning over this self isolation period.

ABACUS Continued Learning Program consists of a vital set of subjects (including Maths and English) delivered by the excellent teachers who make up our academic team.

The Program offers live interactive classes where the pupils can ask questions and get answers from the teachers in real time, and can hold conversations with each other.

Go ahead and register your child for this Program: find out how you can get more from this package on [www.myabacusng.com](http://www.myabacusng.com). We are all in this together, and I assure you that together we can beat this.

Thanks.

Sincerely Yours

**Ruth Ukwen K**

Program Coordinator

The Abacus Continued Learning Program employs technology to provide an alternative teaching path which frees parents from an unfamiliar responsibility of directly managing their children's academic learning, over this period.

## Program Analysis

The Program covers learning and performance assessment planned monthly, meaning access to the Program must be renewed monthly - during or immediately after the assessment period is recommended.

Learning will be conducted through a couple of modes:

### Virtual Classrooms (Live Classes)

Once registration is concluded and the pupils are assigned passwords and personal mail accounts (to serve as their storage lockers), they will be welcomed to their Virtual Classroom (for each grade level). Here they must be present at the stipulated time to be part of the day's lessons: they will all be able to see their teacher, and each other on the screen, ask questions and get answers immediately,

### Recorded Video Lectures

To prepare the pupils for some more involving topics, good quality videos will be produced with the teacher breaking down the essential points to aid pupils' understanding of the subject matter. These videos they can watch on our dedicated YouTube channel, or off our Facebook page.

### Downloadable Worksheets

Homework, worksheets and other learning materials relevant to the pupils and their parents shall be uploaded to the ABACUS website or cloud, where the pupils can have access to them for downloads.

### Performance Assessments

Over the course of the month, each child's understanding of the classes shall be tested. This will involve quizzes, projects, and monthly assessment tests. At the end of the month, each child's performance map, according to the test results, will be collated & mailed to the parent.

## Requirements

### For Parents

Every child signed up for the Program is expected to have at his/her disposal a smart communication gadget (connected to a superfast internet service), to be part of the classes. These may include an android phone, or a tablet, or a personal computer, or a smart television set.

A good earphone will help cut off external noises during class.

It is important that the students are available at the stipulated time (according to the timetable), with their writing/study materials for the classes. Learning will proceed on schedule each day.

## Program Access

The Program fee per month (for a child registered on the Individual Plan is N10,000 only. Every child is allowed a 1 week trial period to enjoy learning the ABACUS way. Our Sibling Power package allows a 10% discount for a subsequent payment for another sibling - the initial sibling pays the full learning charge.

## Courses Offered

This is the breakdown of all the subjects (specific to each grade level) offered on the Program:

### Grades 1-3

Numeracy  
 Literacy  
 Natural Science  
 Reading & Comprehension  
 History  
 Leadership  
 Variety Features  
 Performance Assessment

### Grades 4-6

Maths  
 English  
 Natural Science  
 Aptitude & Reasoning  
 History  
 Leadership  
 Variety Features  
 Performance Assessment

### JSS 1-3

Mathematics  
 English  
 Natural Science  
 Reading & Comprehension  
 Leadership  
 Business Studies  
 Variety Features  
 Performance Assessment

### SSS 1-3 (Science | Arts)

Maths	Maths
English	English
Chemistry	Economics
Physics	Government
Biology	History
Geography	

*The Learning Timetable is provided on our website: [www.myabacusng.com](http://www.myabacusng.com).*
